## SUMMARY

---

Software Developer and Frontend Team Lead with 2+ years shipping production web applications in React, Node.js and MongoDB. Leads a team of 10 and owns delivery across payments, real time systems and REST APIs.

## PROFESSIONAL EXPERIENCE

---

### Software Developer

March 2026 to Present

*BangoPure Limited, Remote, United Kingdom*

- Lead the frontend team after promotion to Frontend Team Lead, mentoring 10 developers and owning delivery of the frontend codebase.
- Build scalable digital platforms for GreenTech and EdTech clients across Europe and Africa, supporting sustainable innovation and digital learning.
- Run structured code reviews and sprint planning across the team, keeping collaborative project delivery on schedule.

### Full Stack Developer

September 2025 to March 2026

*Scholars Avenue (Scholarslee), Remote, Germany*

- Implemented Stripe payment processing, real time chat via Socket.io, and calendar scheduling to streamline the booking experience.
- Architected scalable REST APIs with Node.js, Express, and MongoDB ensuring reliability under concurrent user loads.
- Led full stack development of Scholarslee, a study abroad mentorship platform connecting students with mentors worldwide.
- Built mentor review and rating system with quality controls, maintaining high platform trust and user satisfaction.
- Owned end to end design and development: conducted user research, built wireframes and prototypes in Figma, then implemented them in React.

### Full Stack Developer

August 2024 to August 2025

*RubrixCode, Hybrid, Islamabad*

- Built Sweden Relocators Portal for a Swedish client, a relocation platform covering housing, visa, job search and settlement services.
- Designed and implemented responsive UI components, RESTful APIs, and database schemas, delivering full client satisfaction.
- Optimized frontend performance achieving fast page load times across all devices and screen sizes.

## PROJECTS

---

### Sweden Relocators Portal | *React, Node.js, Express, MongoDB, Material UI*

- Built a responsive relocation platform for a Swedish client covering end to end relocation and embassy related services.
- Improved UX through repeated usability testing iterations with the client.
- Optimized frontend performance for fast load times across all devices and screen sizes.

### Algodinero | *React, Node.js, Market Data APIs*

- Built a full stack algorithmic trading platform where users design, backtest and deploy automated trading strategies.
- Integrated real time market data feeds powering live strategy execution across the platform.
- Developed portfolio analytics so users track the performance of their deployed strategies.

### CasaBelle | *React, Node.js, Blockchain, AI*

- Integrated secure authentication, automated email services, and AI sentiment analysis for property review verification.
- Developed responsive frontend interfaces and UI/UX workflows for a blockchain powered real estate and fractional property investment platform.
- Contributed to property tokenization, fractional ownership management, and smart contract based rent distribution.

### Neuro Mark | *React, Node.js, Express, MongoDB, Deep Learning*

- Built an AI driven HR SaaS platform with facial recognition based attendance tracking.
- Automated core HR workflows using deep learning models, eliminating manual tracking processes at scale.

- Deployed the platform for multiple corporate clients running attendance and HR operations on it.
