## SUMMARY

---

AI Software Engineer and Full Stack Developer with 2+ years designing scalable web architectures and deploying machine learning models into production. Skilled in Python, Deep Learning, NLP, Sentiment Analysis, and RESTful APIs, combined with full stack React, Node.js, Express, and MongoDB systems deployed on AWS with Docker.

## PROFESSIONAL EXPERIENCE

---

### Software Developer & Frontend Team Lead

March 2026 to Present

BangoPure Limited, Remote, United Kingdom

- Promoted to Frontend Team Lead, mentoring 10 developers, managing structured code reviews, and establishing engineering best practices.
- Build scalable digital platforms for GreenTech and EdTech clients across Europe and Africa in React, Node.js, and MongoDB.
- Architected reusable component systems and CI/CD deployment pipelines, accelerating release cycles across multiple production environments.
- Lead sprint planning and technical architecture sessions, ensuring reliable cross functional project delivery.

### Full Stack Developer

September 2025 to March 2026

Scholars Avenue (Scholarslee), Remote, Germany

- Led full stack architecture and development of Scholarslee, an international mentorship platform connecting students with global mentors.
- Implemented secure Stripe payment integration, real time messaging using Socket.io, and automated booking workflows.
- Architected high throughput REST APIs with Node.js, Express, and MongoDB, optimizing database indexes for concurrent user requests.
- Developed mentor review and rating verification system with automated fraud prevention and quality controls.

### Full Stack Developer

August 2024 to August 2025

RubrixCode, Hybrid, Islamabad

- Built the Sweden Relocators Portal for a European client, delivering full stack housing, visa, and immigration service workflows.
- Engineered responsive frontend interfaces and secure RESTful backend endpoints with Node.js, Express, and MongoDB.
- Optimized database queries and frontend asset loading, achieving sub second page loads and seamless mobile responsiveness.

## PROJECTS

---

### Neuro Mark | React, Node.js, Express, MongoDB, Deep Learning

- Engineered an AI driven HR SaaS platform featuring deep learning facial recognition for automated employee attendance tracking.
- Developed microservice architectures for computer vision inference pipelines, eliminating manual employee check ins at scale.
- Deployed multitenant SaaS backend with role based access control (RBAC) across multiple corporate enterprise clients.

### CasaBelle | React, Node.js, Blockchain, AI

- Developed responsive web application workflows for a blockchain powered real estate and fractional property investment platform.
- Integrated secure user authentication, automated transactional email pipelines, and AI sentiment analysis for verified property reviews.
- Built smart contract based tokenization workflows, property shares ledger, and automated rental payout calculations.

### Algodinero | React, Node.js, Express, Market Data APIs

- Architected a full stack algorithmic trading platform allowing quantitative users to design, backtest, and deploy automated trading strategies.

- Integrated real time market data streaming via WebSockets to execute high frequency strategy orders with low latency.
- Built interactive financial portfolio analytics and risk metrics visualizations for live strategy performance monitoring.

### Sweden Relocators Portal | *React, Node.js, Express, MongoDB, Tailwind CSS*

- Built a full stack immigration and relocation platform covering housing, visa tracking, and embassy documentation management.
- Engineered multi step asynchronous application wizards and secure document storage pipelines for international applicants.
- Implemented caching strategies and REST API query optimizations, improving response times across high traffic portal pages.

## TECHNICAL SKILLS

---

**Languages:** JavaScript (ES6+), TypeScript, Python, C++, SQL, HTML5, CSS3

**Frameworks and Libraries:** React.js, Node.js, Express.js, Next.js, Tailwind CSS, Material UI, Socket.io, Redux

**AI and Machine Learning:** Machine Learning, NLP, Deep Learning, OpenCV, Sentiment Analysis

**Databases and Cloud:** MongoDB, PostgreSQL, Redis, AWS (EC2, S3), Docker, Kubernetes, CI/CD, Linux

## EDUCATION

---

**Bachelor of Science in Software Engineering**

*August 2022 to July 2026*

*FAST NUCES, Mansehra, Pakistan*

Relevant Courses: Data Structures, Algorithms, Database Systems, Operating Systems, Software Architecture, DevOps, AI/ML, NLP

## ACHIEVEMENTS & CERTIFICATIONS

---

- Gold Medalist, top scorer in ETEA 2022
- 1st Place, Web Design Competition, Deenfest 2024
- **Certifications:** IBM Agile Development and Scrum (2025), Stanford Machine Learning (2025), IBM Frontend Development with React
- **Languages:** English (Fluent), Urdu (Native), German (A1)
